

Day 13 – Kent's Cavern and a Boat Trip

Before we went into Kent's Cavern we could look around in the shop there, where we could find a lot of cool stuff like fossils and minerals. When the guide came he led us through the caves. It was amazing to see this big wonderful cave. There were these tall stones made by water dripping from the stones above us. They are called stalactites. When we went deeper into the caves we realized what a bad life the miners had. The only light they had were candles and lanterns though the cave is very very dark. When we had finished looking at the caves we went to Paignton by a little ferry. We had some freetime there that we spent as usual. Finally we went back to Torquay by coach which was the end of our day.
