

Friday, 17th May

Most people think school is just boring but the English Riviera School is so much more than that. The teachers teach us something new in an incredible, thrilling and understandable way.

After school we went to Exeter. On the way Nathalie already told us something about the city and its sights, like Exeter Cathedral, the University of Exeter and the historic baths. After we had arrived we were split into three groups and then went to the Exeter Underground Passages. When we arrived there, we watched a film about them in medieval times. Then we put the helmets on. We walked through the passages and even squeezed through a one-meter small hole. After this adventure we went to the cathedral, which was breathtaking. For the rest of the afternoon we had some free time to go shopping. It was a very nice and interesting day.

Nele and Wilhelmine
